Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Brazilian reference 8100906U, which shows all of the claimed limitations. The reference shows a barbecue unit including, among other things, a base 02, a cover 02 pivotally connected to the base, a motor for driving the spits (see at least abstract), and at least two rows of spits support on the base and cover when the cover is open (see at least fig. 3).
3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Speakman (2,020,808), which shows all of the claimed limitations. Speakman shows a barbecue unit including, among other things, a base 2, a cover 1 pivotally connected to the base, and a motor 17 with gears 20,30 driving the spits 4,11.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3749

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining

obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brazilian

reference 8100906U, which shows substantially all of the claimed limitations. Brazilian

reference 8100906U does not appear to show gears. Since there does not appear to

be a ready translation and the language of the reference appears to be that of the

applicant's residence, a translation would be helpful in expediting prosecution.

Nevertheless, even if Brazilian reference 8100906U does not specifically recite gears,

Official Notice is given that the use of gears with motors is old and well known in the art.

Such an arrangement has the clear and obvious benefit of providing for efficient transfer

of motion from the motor to the object to be driven. Accordingly, it would have been

obvious to one of ordinary skill in the art at the time of the invention to incorporate gears

into the invention disclosed by Brazilian reference 8100906U, so as to provide for

efficient transfer of motion from the motor to the object to be driven.
